DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 6 and 20, drawn to a computer network method for payment or fund transfer over at least two networks using telecommunication accounts through at least one telecommunication carrier provider and a wireless communication device, classified in class 705, subclass 40.
- II. Claims 33 - 45, drawn to a computer system and readable storage medium storing instructions that, when executed by computer to perform a method of payment or fund transfer transactions, classified in class 235, subclass 380.

Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Group I has a different function regarding a computer network method for payment or fund transfer over at least two networks using telecommunication accounts through at least one telecommunication carrier provider and a wireless communication device. Claim 1 for example, does not require a computer system and readable storage medium storing instructions that, when executed by computer to perform a method of payment or fund transfer transactions to impart patentable distinction to the method recited therein.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Species

In the event the applicant elects Group I above, the applicant is further obligated to elect among the following species as follows:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species of claims 1, 2 and 3, wherein the step of receiving a password from the payor, further includes the steps.

Species of claims 1, 2 and 4, a method further comprising providing a prepaid card.

Species of claims 1, 2 and 5 - 6, further includes after authentication.

Species of claims 1, 2 and 20, further includes the step for the user to establish sub-account.

In the event the applicant elects Group II above, the applicant is further obligated to elect among the following species as follows:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species of claims 33, 34, 35 and 41 - 42, wherein the step of receiving a password from the payor, further includes the steps.

Species of claims 33, 34, 36, 40 - 41 and 43, further includes providing a prepaid card.

Species of claims 33, 34, 37, 38, 40 - 41 and 44 - 45, further includes after authentication.

Species of claim 33, 34 and 39 - 40, further includes the step for the user to establish sub-account.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claim 1 is generic for Group I; Claim 33 is generic for Group II.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Rob Rhode** whose telephone number is **571.272.6761**. The examiner can normally be reached Monday thru Friday 8:00 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Rob Pond** can be reached on **571.272.6760**.
